

## **FREE Live Webcast Training**

# **CRISIS MANAGEMENT IN A RURAL SCHOOL**

The Rural Domestic Preparedness Consortium (RDPC) is pleased to offer FREE web-based training for rural communities on the coordinated response between local first responders and school systems to a crisis in the K-12 environment. Close coordination between first responders and school administrators, staff, and teachers is essential for an effective and efficient response to a crisis situation at a school. This is particularly important for rural communities where resources are limited, response times can be delayed, and personnel may serve in multiple roles. This is not tactical response training, but an examination of the actions that could take place among all entities involved.

### **Date & Time:**

Tuesday, April 27, 2010

2:00 - 4:00pm Eastern

1:00 - 3:00pm Central

12:00 - 2:00pm Mountain

11:00am - 1:00pm Pacific

### **Target Audience:**

The training is intended for all first responders, school administrators/personnel, and other support agencies.

### **To Register:**

All participants must register at  
[www.ruraltraining.org/webcast/register](http://www.ruraltraining.org/webcast/register).

Each registrant will be required to take a brief pre-test before receiving information to log in to the broadcast.

# Key learning objectives for this program include:

- Explaining the importance of emergency management planning prior to an event.
- Identify the roles, responsibilities, and expectations of both school personnel and local law enforcement given a school shooting incident.
- Recognizing growing threat indicators that could escalate to a school shooting incident.
- Describing steps to aid students through the recovery phase after an incident occurs.

The RDPC is funded by the U.S. Department of Homeland Security (DHS), Federal Emergency Management Agency (FEMA), National Integration Center (NIC), Training and Exercise Integration as a provider of all-hazards training and information specifically for rural communities.
